EACH ONE IS UNMISTAKABLY MOBILVETTA

With Mobilvetta comfort and excellence go together with the best construction techniques and high performance. Over time Mobilvetta has earned its sound reputation in the outdoor living world for being able to transform craftsmanship into design. Italian manufacturing traditions meet international trends through technologically advanced equipment and superior quality standards.

The road travelled through tradition is a journey that goes hand in hand with a company that always strives to be innovative, from efficient industrial processes to the modern scenario of those who always live in the moment.

This is the story of Mobilvetta.

With the **K-Yacht Tekno Line** and **Kea I** range of motorhomes, the low-profiles **Krosser** and **Kea P**, the compact low profiles **Kea Kompakt** and the **Admiral** van, Mobilvetta is exploring the world of exclusivity in motorcaravans with a unique and unmistakable personality.

The beginning of a journey is a magical moment, there is always that first step, the first bend in a road: it is the threshold beyond which everyday life begins to slip away. There are those who have written their story on the back of that magical moment. Mobilvetta has imagined every possible trip on board its motorhomes for over 50 years.

*Really comfortable
spaces mould around
the traveller for
an unforgettable
experience on their
way to their favourite
destination.*

Choosing Mobilvetta today means being able to rely on a Premium brand for:

Distinctive Made in Italy design and style;
Technology, autonomy and safety;
Premium class comfort;
Passion for quality.

START YOUR JOURNEY NOW.
IT IS TIME TO BRING OUR WORLD INTO YOUR WORLD.

DISTINCTIVE MADE IN ITALY DESIGN AND STYLE

The design lines, to be followed like roads on an adventure of comfort, transform getting on board into a magic moment. Follow those lines by exploring the distinctive details. Mobilvetta has paved the way to exclusivity in motorhomes by defining lines with unique, unmistakable personalities.

TECHNOLOGY, AUTONOMY AND SAFETY

Comfort and excellence go together with the best construction techniques for a practical lifestyle, always looking towards new horizons:

- Technological innovation;
- Research into new technical solutions;
- High performance for comfort, roominess and autonomy;
- Efficient industrial processes;
- Safety while travelling and on holiday.

PREMIUM CLASS COMFORT

Each trip will be a journey through the senses: lights, sounds, surfaces, taking you to the peak of absolute comfort. On board a Mobilvetta you feel at home: a motorhome comfort experience at the highest level. Beauty is in the discovery of new places, but also in the rediscovery of a place that surrounds and envelops us.

PASSION FOR QUALITY

Refined materials means quality: wood, edges and thicknesses, fabrics, surfaces and craftsmanship. This is the magic recipe of Made in Italy. It is nice to get lost in every detail and recognise all the care and passion behind the choice of the highest quality raw materials and technologies.

2026 MOBILVETTA RANGE

MOTORCARAVAN

MOBILVETTA

Design has always been a hallmark of Mobilvetta: unique, elegant models with distinctive, personalised lines.

DISTINCTIVE MADE IN ITALY DESIGN AND STYLE

THE BEAUTY OF A HOLIDAY

in the company of those you love is hidden in the details. We care for them tirelessly, because all together they make an experience unforgettable. Any detail is a part of a whole story.

THERE ARE ALL THE DETAILS,

for classy living. Everything is about feeling good in the van. A holiday has the taste of freedom and the warmth of staying together. To better share the space with your loved ones.

A PLEASANT FEELING OF SPACE

to move and live in harmony welcomes you. All the design choices combine functionality and aesthetics, giving priority to living comfort on board.

**WHEN A MOTORHOME OR A VAN IS
TOP CLASS,**

everything is designed to live it to the fullest. Mobilvetta is synonymous with sophisticated elegance, beauty and distinctive details.

TECHNOLOGY, AUTONOMY AND SAFETY

Mobilvetta now reaches new standards for living the world in natural harmony while respecting its resources and peculiarities.

Every holiday becomes an experience to be savoured with the senses and the heart, in complete safety. Beyond each destination, everyone builds their own lifestyle by interacting with the environment around them but always in harmony with it.

An invitation to travel.

I-NETX SYSTEM

i-NetX System gives you total control over all your motorhome's devices and utilities with a central control panel, easy to use and customisable. Reliable and upgradable.

100 % LED

100% sustainable lighting.
Environmentally friendly.
Long life.
Increased autonomy.
4 dome lamps.
Under-wall unit light frames and furnishing LEDs.
Floor step markers.

DOUBLE BATTERY SYSTEM

With battery disconnecter, automatic or manual.
Battery management up to 2000W input/output, with microcontroller.

LITHIUM BATTERIES-READY

In a motorhome it is important to have some spare electricity available during stops.

Two lithium batteries 100 Ah (optional on K-Yacht Tekno Line, Krosser, Kea I, P and Kea Kompakt).
Lithium Pack: dedicated electrical system and battery charger, control unit and lithium battery (optional on van Admiral).

INCREASED TANKS

K-Yacht Tekno Line e Krosser: 145 l fresh water, 135 l grey water.

Kea P and Kea I: 120 l fresh water, 90 l grey water.

Kea Kompakt 55, 64: 120 l fresh water, 90 l grey water.

Kea Kompakt 68: 90 l fresh water, 90 l grey water

Admiral: 85 l fresh water, 75 l grey water.

TEKNIbox

All electrical utilities in a single location. Without leaving the motorcaravan. Easy access to the most important controls, for daily maintenance.

COMPRESSOR REFRIGERATOR

"Fast" start option, cooler and faster. Separate functions to activate the refrigerator and freezer. Smart energy consumption.
K-Yacht Tekno Line 174 liters
Krosser 174 liters
Kea I and Kea P 174 liters
Kea Kompakt 150 liters
Admiral 84 liters

WI-FI CONNECTIONS AND SMART TV

Relaxation, entertainment, information, work. Safely and freely. Mobilvetta combines Wi-Fi connection with a smart TV (24" or 32") in the **Media Pack!** Your preferred streaming channels, your favourite apps, information about your destination, always available.

FOG LIGHTS WITH CORNERING FUNCTION

To offer greater visibility side in dark conditions, switching on automatically when the vehicle turns at low speed.

TYRE PRESSURE MONITORING SYSTEM (TPMS)

Check the pressure of the tyres, noting the dips on the on-board display.

FULL LED FRONT LIGHTS (K-Yacht Tekno Line and Kea I)

STEERING WHEEL CONTROLS

16" ALLOY WHEEL

ELECTRIC HANDBRAKE (Not available on K-Yacht Tekno Line)

The specifications contained herein may refer to only certain models of the range.

DAY COMFORT

Mobilvetta transforms every space into comfortable, multifunctional and highly aesthetic living solutions. The interior spaces blend functionality and aesthetics, favouring liveability on board with furnishings and modular solutions to define places for relaxation and conviviality. The interpretation of comfort does not renounce refinement and offers a contemporary interpretation.

Experience the dinette: it has large sofas that can be converted, the folding top table with its high-quality chrome leg with eco-leather protection (K-Yacht Tekno-Line and Krosser) and the visible part of the sofas covered with special faux leather upholstery that not only makes the room more luxurious, but also protects it from everyday life on board.

PERFECT CLIMATE:
6 KW Heating
(motorcaravans)
Tested in the climate
chamber.
Anti condensation system.

As in a real living room, the comfort of a chaise longue, between the passenger seat and the side sofas. Spend your time in your motorhome in the best possible way : LED light creates unique environments, it is nice to relax in front of the TV that you can see from every area of the motorhome thanks to the extendible and adjustable arm, USB sockets, lots of space thanks to the floor hatches and the warm atmosphere of the soft-touch coating.

In less than a metre, ergonomics and user-friendliness. The Mobilvetta kitchen is an adaptable multifunctional space: surfaces that multiply, worktops that expand, even with burners in use. Complete and full of accessories such as the practical integrated storage trays. All this in an elegant ambience, with high-quality materials and solutions such as the hard-wearing acrylic stone top moulded into a continuous one-piece surface or scratch-resistant laminate top designed for maximum ergonomics.

NIGHT COMFORT

Live intensely: just think about feeling good: Mobilvetta offers sleeping environments that go at your own pace.

Solutions for everyday living that suggest a new concept of comfort and relaxation in exclusive and cosy environments.

The embodiment of well-being and style!

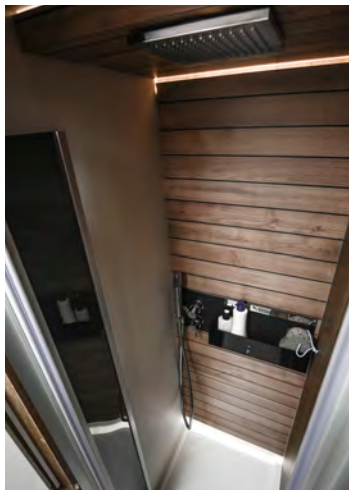

Extraordinary sleeping experience:

Maximum ventilation, protection in summer. Extra-large windows, skylight, flyscreen and blind.

Fixed beds at the right height. Slatted bases, memory foam mattresses with breathable fabric bottom (motorcaravan) or mattresses with 3d System bed bases (van), antibacterial fabric.

Speakers for relaxing, Roman blinds, eco-leather panels. Soft-touch coating for walls or roof.

Don't just call it a bathroom.

An exclusive luxury bathroom, a comfortable environment where you can enjoy your daily hygiene and personal care in a very special way.

The harmony of shapes and materials provide elegance to spaces that can be personalised.

The shower base is made of thermoformed ABS and reinforced on the inside with polyurethane foam.

In a small space you have everything: maxi storage, wall and overhead mirror, large washbasin.

Always the right atmosphere thanks to the correct balance between natural light from the outside and artificial light inside. Natural light filters through large windows and portlights. In the evening, specific solutions transform each room according to the activity taking place in it: LED spots, light frames, indirect lighting, floor courtesy lights.

THE FINEST MATERIALS FOR EXCLUSIVE AND COSY ENVIRONMENTS

Refined materials means quality: wood, edges and thicknesses, fabrics, surfaces and craftsmanship. This is the magic recipe of Made in Italy, codes that have always identified top quality and customised motorhomes and vans.

ACRYLIC STONE

Latest generation material used in furniture, design and architecture, for indoor and outdoor settings.

Acrylic stone, cast in one mould and mouldable for exclusive designs, is durable, hygienic, non-toxic, hypoallergenic and durable.

It endures use and abuse caused by kitchen equipment and humidity.

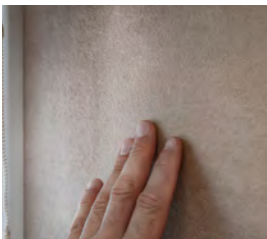

It is easy to clean and maintain, waterproof, impervious to stains, scratch, moisture and mould resistant.

TEAK WOOD

Its structure and composition make it an excellent wood that is used in shipbuilding due to its strength and value. Its oily nature does not allow it to easily absorb water and moisture.

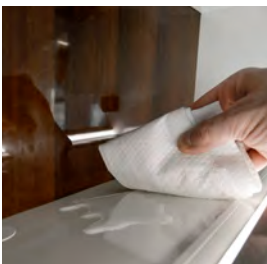

Teak is also very resistant to the penetrating and corrosive action of water, as well as to temperature sudden changes.

SOFT TOUCH

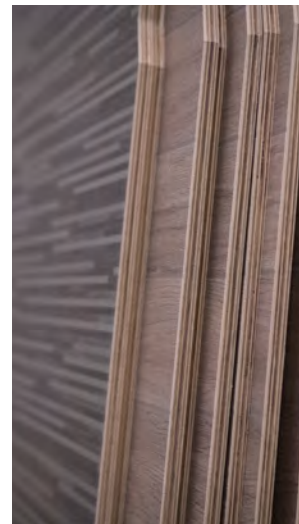

A coating with a velvety finish and natural powder colour covers the fibreglass interior.

Its qualities: velvety finish, resistant to fingerprints and excellent abrasion resistance, easy to clean. Thermal and acoustic insulation.

HPL LAMINATES

The base of the wall units and the outer side of the kitchen are made of HPL high-pressure laminate, an innovative, easy-to-clean and service innovative material that resists the passage of water, heat and scratches. With an antibacterial coating, it ensures hygiene and cleanliness (Admiral).

FLOOR COVERED IN THICKER PVC

Anticracking.

Covering the roll noise of the road.

Covering the footfall noise.

Floor with double thickness! (Admiral)

MEMORY FOAM MATTRESSES

This thermosensitive, viscoelastic material has the ability to deform when stressed by pressure and heat and maintains a constant body temperature.

It adapts to your shape, creating differentiated support. It memorises the deformation undergone, but at the same time has the memory to return to its original shape. **Favours a natural posture:** better circulation against tingling and back pain.

Memory mattresses are orthopaedic, ergonomic, do not suffer humidity, are light, non-deformable and breathable, anti-allergic and anti-mite.

REINFORCED ABS SMART

The shower base is made of thermoformed ABS and reinforced on the inside with polyurethane foam. Greater rigidity and more resistance are guaranteed by high density foam compared with a standard ABS shower base. The advantages: no deformation, no splits, no cracks.

PLENTY OF SPACE FOR YOUR DESTINATIONS

Internal insulation in extruded polystyrene with structural strips for greater rigidity and tightness.

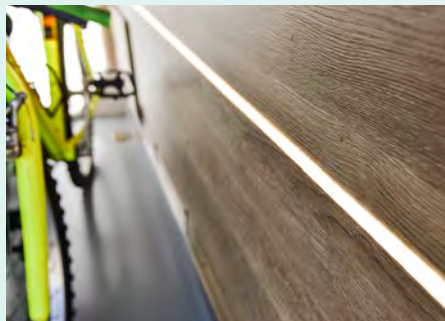

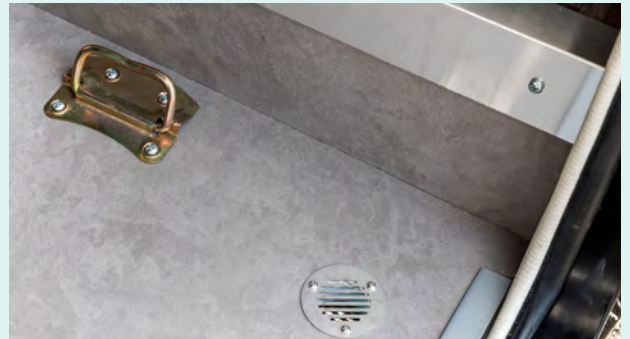

Upper fiberglass cover for greater heat insulation and mechanical resistance. Linoleum flooring for wear surface protection and easier maintenance.

Fiberglass lower cover to protect against chip stones, external humidity and salt in the streets.

With 6 tie-down rings and 2 floor drain grilles.

IT HAS A HIGH LOAD CAPACITY: up to 300 kg of load.

We tested it on the go!

The specifications contained herein may refer to only certain models of the range.

QUALITY AND RELIABILITY PRIVILEGE

GUARANTEED FOR 10 YEARS

Choosing Mobilvetta means relying on a brand with long experience in the constant search for new technical solutions that can ensure high performance, value and durability.

Only a few of us can guarantee such a long period of peace of mind.

10-YEAR GUARANTEE AGAINST INFILTRATION

10 Years Body Integrity Privilege is a service designed with a single objective: to ensure your motorhome over time by offering reliability and safety*.

How can we do this?

We use high-performance materials.

Our production processes are innovative and efficient.

We carry out quality tests during production.

We carry out performance and statistical tests at the end of line.

100% of our motorhomes or vans are tested against infiltration.

* Carry out regular maintenance at the authorised Mobilvetta network and the tests provided for the control of infiltration to be carried out during the service coupons as per the specific deadline specified in the warranty booklet. For the detailed conditions ask the authorised sales network.

VAN: INSULATION

Van panels interior lining with highly-insulating materials: polyester fibre covered with aluminium film.

Anti-condensation insulation.

No thermal bridges.

Total coverage: on panels, roof, floor.

Polyester fibre: non-toxic, hypoallergenic and mouldresistant. Resistant and longlasting. Good soundproofing capabilities.

Aluminium film: a light, versatile and ductile material. Resistant to heat and sudden temperature changes. It increases the thermal insulation capacity and is a moisture barrier.

Insulation and protection for all seasons.

Composite panel lining with soft fabric.

Microfiber roof lining.

External wall lining in soft-touch fabric.

NOISE
REDUCTION
Experience

SOUNDPROOFING

Just the sound of your emotions: study of noise reduction is the proof. Roof covered in microfiber with foam inserts. Padded panels at the rear windows. Increased thickness of internal furniture. High thicknesses. From 14 mm to 20 mm. Floor covered in thicker pvc.

MOTORCARAVAN: INSULATION

Style, equipment and technique are the hallmarks of the external structure of Mobilvetta motorhomes: a unique style, elegant with a sporting soul, excellent equipment and high-performance materials and a cutting-edge construction technique that involves the use of fiberglass and aluminium, reinforcement elements and couplings to ensure high performance in terms of stability, structural strength and duration.

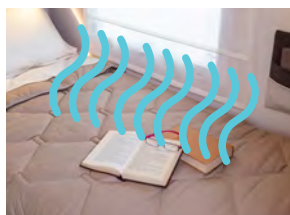

GRADE 3 is a certification obtained by passing a specific test in a climate chamber.

MOTORCARAVAN: ANTI-CONDENSATION SYSTEM

The correct distribution of internal air favours its circulation, ensures an even temperature and prevents the accumulation of condensation.

PERMANENT AIR VENTILATION

The wall units are installed by leaving a space from the wall of the motorhome, thus favouring an even distribution of air.

ANTI-CONDENSATION PANELS

spaced away from the wall in living and sleeping areas.

PERIMETER HEATING

in models with twin beds.

Integrated Quality, Environment and Safety System Certification.

SEA SPA operates in compliance with a whole series of parameters aimed at guaranteeing the end customer, the community and employees controlled, verified and always constant quality, environmental impact and occupational safety standards.

Certificate number:
ISO 9001: MSC-9-1117
ISO 14001: MSC-14-1118
ISO 45001: MSC-45-1119

MASS IN RUNNING ORDER

Includes the weight of the empty base vehicle, the driver (75 kg), fuel and fluid tanks filled to at least 90%, fresh water tank filled to maximum capacity as declared by the manufacturer ref:'travel', gas cylinder for domestic use with a maximum weight as declared by the manufacturer. The mass in running order, and consequently the payload and/or travel seats, may vary depending on the installed accessories.

The Mass in Running Order value shown in the commercial documentation is the value calculated during the homologation procedure and may differ from the delivered vehicle's value due to production tolerances. The legally allowed deviation is $\pm 5\%$. During the purchasing process, it is necessary to verify the weight of the optional equipment intended to be installed on the vehicle.

PAYLOAD

It is the difference between the technically permissible maximum mass and the mass in running order. The payload includes elements for habitation, passengers 'transported' as defined by the manufacturer (excluding the driver), and personal belongings. The minimum payload calculation is based on the following parameters: 75 kg for each passenger (excluding the driver), 10 kg of luggage for each passenger and the driver, 10 kg for each meter of vehicle length. The remaining payload can be used for installing accessories or additional luggage.

Anything not included in the standard version of the vehicle, both cell and chassis, increases the mass in running order and consequently reduces the payload, potentially reducing the number of approved seats. Available payloads result from the difference between the technically permissible maximum mass and the mass in running order. During the purchasing process, it is necessary to verify the weight of the optional equipment intended to be installed on the vehicle. The weight of non-standard accessories is not included in the mass in running order. Additional accessories and devices reduce the payload by an amount equal to their weight; the weight impact of individual accessories is listed in the appropriate column in the price list or can be requested at our dealers' shops. Please note that the law does not allow exceeding the technically permissible maximum mass, which can be found in the technical sheet specifications. Ensure that the maximum axle loads and the technically permissible maximum mass are not exceeded during full vehicle loading. The number of approved seats may vary depending on the regulations of individual countries regarding circulation.
